

Article 3 Mercury Supply Sources and Trade

Please refer to individual EU Member State reports submitted to the Minamata Secretariat according to Article 21 of the Minamata Convention.

For EU Member States not Party to the Minamata Convention and EU Member States who have not yet reported to the Minamata Secretariat under Article 21 of the Minamata Convention, the following available information has been summarised (t/year).

Member State	Large scale sources information	# Facilities	#FacilityStock	Amount Stored	Amount Sent To Temporary Storage	Amount Sent To Conversion	Amount Sent To Permanent Storage	Amount Mercury Waste Stored
Belgium		1	1	0	0	0	188,16	105
Spain	Chlor-alkali production industries in which mercury is used as an electrode have been dismantled. There is none in Spain with that technology. There is not activity of mercury primary mining in Spain. Non-ferrous mining and smelting operation are insignificant in Spain. It was not possible to obtain information about potential activity of the cleaning of natural gas.	1	1					186,27
