

Dear Secretariat,

I have attached several publications on cinnabar production and trade from our network and colleagues that could contribute to the work of the group. I would also recommend looking into trade data emerging from several market analysts on the issue. Example <https://businessnewswire.online/news-release-global-cinnabar-natural-mercury-sulfide-oxide-production-analysis-import-export-price-update-2025/>

I would also recommend further consideration of this 2018 report from Nexus 3 Indonesia as most of the content related to mercury compounds are still relevant. It is a large file so I have not attached it but it can be downloaded here:

https://www.researchgate.net/publication/355845660_Mercury_Country_Situation_-_Indonesia_2018

Best regards,

Lee Bell
