Se identificó un sitio donde hay existencias superiores a 50 toneladas en nuestro territorio. Corresponde a la actividad minera, donde el mercurio elemental, se obtiene como subproducto. Debido a que Argentina no cuenta con operadores habilitados para dar tratamiento al mercurio elemental, surge la necesidad de exportación, y como consecuencia, hasta el momento de concretar la exportación, el mercurio, debe ser almacenado de una forma ambientalmente racional.

A fin de velar por esto, desde el Punto Focal Técnico del Convenio, se realizaron dos visitas al establecimiento, en las que se pudo observar que, la forma de almacenamiento de mercurio líquido, cumplía con la normativa aplicable, y se realizaba de manera ambientalmente adecuada.

De acuerdo a lo mencionado anteriormente, la firma solicitó permiso para realizar la exportación, a Suiza, donde el mercurio elemental es estabilizado y transformado en sulfuro de mercurio (HgS), para posteriormente ser enviado a Alemania para su disposición final.
