MAKE MERCURY HISTORY

**MINAMATA  
CONVENTION  
ON MERCURY**

# GLOBAL MINIMUM TRANSPARENCY STANDARD (GMTS) FOR HAZARDOUS CHEMICALS IN PRODUCTS – A TOOL FOR THE PROTECTION OF HUMAN HEALTH AND THE ENVIRONMENT FROM TOXIC EXPOSURE, INCLUDING MERCURY

This event will introduce the Global Minimum Transparency Standard (GMTS) concept as a tool for companies to disclose information on hazardous chemicals in products throughout product life cycle to ensure the safety of health and the environment and support a non-toxic circular economy. GMTS can help keep track of Minamata Convention Annex A products and those not covered by the Convention and thus support the proper handling of products throughout their lifecycle.

## LIST OF SPEAKERS

- Dr. Olga Speranskaya and Alexandra Caterbow, co-directors of Health Justice Environment Support;
- Dr. Andreas Prevodnik, Senior Policy Advisor Chemical Pollutants and Chemicals, the Swedish Society for Nature Conservation;
