

COP-4 INDONESIA
ONLINE 1-5 NOVEMBER 2021
BALI 21-25 MARCH 2022
MAKE MERCURY HISTORY

MINAMATA
CONVENTION
ON MERCURY

PART 2: ENGAGING THE ARTISANAL AND SMALL-SCALE GOLD MINING (ASGM) AND COAL ENERGY SECTOR TOWARDS A MERCURY-FREE INDONESIA

Let's Make Mercury History! Not just a slogan, but a global commitment that must be realized. Indonesia is also committed, taking a role to contribute. These are stated in a usage action reduction plan for mercury in priority sectors. Monitoring the mercury reduction targets in these sectors, of course, requires a holistic effort. Various aspects, ranging from policies to applying environment and forestry standards and non-mercury practices at the site level, become a unit of action that contributes to achieving targets. The webinar will promote efforts to reduce mercury at the site level and solicit input on strengthening environmental and forestry standards in support of a mercury-free Indonesia.

LIST OF SPEAKERS

- **Ary Sudijanto**, Director General of Agency for Standardization of Environment and Forestry Instruments (ASEFI)
