THE NORTHERN CONTAMINANTS PROGRAM (NCP): A PARTNERSHIP APPROACH TO MERCURY MONITORING IN CANADA

Organized by the Inuit Circumpolar Council – Canada, Government of Canada, Arctic Monitoring and Assessment Programme (AMAP). [Register here](#).

This side event will showcase the partnership approach to mercury monitoring in Canada with Indigenous Peoples and federal and sub-national government entities as practiced through the Northern Contaminants Program (NCP). The event will describe this unique approach to contaminant monitoring, which has been extremely successful in generating capacity, experience, knowledge and data with regards to contaminant (including mercury) research in the Canadian Arctic; so other countries and organizations can use this model to advance partnerships with Indigenous Peoples in monitoring efforts and to further the holistic generation of information related to mercury.

THURSDAY, 4 NOVEMBER 2021

17:45 – 18:45 CET
