DESCRIPTION

Since 2013, Türkiye has been carrying out a common monitoring strategy for all its seas and coasts by adopting an integrated and ecosystem-based monitoring approach with DEN-İZ Program including 425 stations. Besides, Türkiye established a National Pollutant Release and Transfer Register System in 2021 in the framework of harmonisation with E-PRTR. In the online event, the monitoring experience of Türkiye will be shared to search its potential to serve Minamata Convention.
