

Mercury:

Bridging Science, Policy, and the Minamata Convention through Doctoral Training

EU H2020 MSCA ITN project (2020 – 2024)

- 1) to provide urgently needed training in Hg science within the context of the UNEP Minamata Convention
- 2) to fill key knowledge gaps in biogeochemical Hg cycling linking anthropogenic emissions and Hg in marine food webs

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement no. 860497.
